Provided, that in addition to the appropriation out of State funds for assistance payments and administrative expenses for the biennium, the State Department of Public Welfare is authorized to accept from the Federal Government any funds that may be allocated by said Government to the State Department of Public Welfare for assistance and administration; and said Department can use such Federal Funds allocated for assistance payments and administrative expenses in addition to funds appropriated for those purposes out of State funds.

Provided, further, that none of the money herein appropriated for Old Age Assistance payments, Aid to the Blind payments, or Aid on behalf of Needy Children shall be used for the purpose of paying assistance to any person who disposes of property, either personal or real, for the purpose of qualifying or increasing need for assistance, provided that the property, if still available, would affect either eligibility or the amount of the assistance payment.

GENERAL PROVISIONS

Sec. 2. (1) Annual reports and inventories. Each department head shall make an annual report as of August 31st of each year to the Governor, the State Auditor, and the Legislative Budget Board within one hundred (100) days after the close of each fiscal year, which report shall include the following:

a. An annual financial report showing the true condition of all funds and account balances for which the department head is responsible and reflecting the actual cash on hand and on deposit in banks and/or in the State Treasury accounts due the department from all sources, values of consumable supplies and postage, inventories of movable equipment and other fixed assets. Investments of bonds, notes, and other securities owned by any special funds under the jurisdiction of the department, and all other assets; and all sums for which the department is liable for services rendered or goods received. The report shall also contain summaries by sources of all revenues collected or accruing to the State through the department for the fiscal year immediately preceding and a summary of appropriations, expenditures and all other disbursements of the department for the fiscal year. Provided, however, that the Texas Prison System may, if the Prison Board so elects, issue its report for each year ending December 31st, instead of August 31st. The State Auditor shall approve all reports as to form and report content.

b. A record of the absences of the various employees, and the reason therefor, whether from sickness, vacation, or on leave of absence without pay.

c. A list of all bonded employees showing name, title, and amount of surety bond, together with name of surety company.

d. A statement certifying that all employees have received and receipted for copies of the subsections of these General Provisions which apply to political influence, and that all employees using State-owned automotive equipment have received and receipted for copies of the Statutes relative to the use of such equipment and the preparation of daily use reports thereon.

e. Each Department head shall take a physical inventory count of all State-owned movable property in his custody as of August 31st, of each year, in accordance with instructions issued by the State Comptroller, and by October 1st of each year shall forward one (1) copy of this inventory to the State Comptroller and one (1) to the Board of Control. When there is a change in department heads, for any cause, the outgoing head shall obtain a receipt from the incoming head for all State-owned equipment in his custody.

f. Provided that the State Auditor shall certify to the Comptroller of Public Accounts any and all departments which have not filed the annual report required within the specified time, and the Comptroller of Public Accounts is hereby directed to withhold any salary warrants or expense reimbursement warrants to the heads or any employees of such departments as are on this certified list until such time as the State Auditor shall notify the Comptroller that such delinquent reports have been filed. Heads of departments as used herein shall be defined as elected and appointed officials, members of Commissions, Boards, etc., and/or the chief administrative officer of such Department, Board, Commission, Bureau or Agency for which appropriations are made herein.

(2) Stationery. No part of the herein appropriated amounts shall be used for the purchase of embossed or engraved printing and stationery except for the Governor's office.

(3) Sale of Printed Matter. Any contingent funds herein appropriated and any funds appropriated for printing, may be used under the direction of any department for which any such appropriation is made for the publication and distribution of any notices, pamphlets, booklets, rules, regulations and other matters of public interest; provided that a charge may be made and collected for such publications and notices which will reasonably reimburse funds for such actual expense, but any such pamphlets shall be furnished to another State department without charge.

(4) Postage Stamps. None of the money appropriated herein for postage stamps shall be spent except on vouchers made payable to a United States Post Office and the warrant or check shall be endorsed by the Postmaster from whom the purchase is made. If the expenditures for postage stamps exceed Five Hundred Dollars (\$500) for any one (1) year, each Department, Board or Commission shall install a postage meter machine, and have all purchases for postage recorded on said postage meter machine, except for the purchases of stamps for field offices or traveling employees. The installation cost and rental of said machine shall be paid from appropriations herein itemized for postage and contingent expense.

(5) State-owned Photostat Machines. These machines and photostat supplies shall not be used for private purposes. Official instruments and documents shall not be photostated except upon signed orders from the heads of departments, or an employee designated in writing by the heads of departments, and such designations filed with the Board of Control. The Board of Control shall furnish requisition forms containing such provisions as the Board deems necessary to protect the public interests, to be prepared and used by the several departments in ordering photostatic copies made. Operators of such machines shall make no copies

except upon presentation of signed requisition, and said requisition shall be filed and an annual report made to the Board of Control showing the number of copies made for each State Department, including the department having supervision of the machine. In the event no existing law fixes the price at which copies for private use shall be sold by a department, it is hereby provided that such departments shall collect for any copies sold at the same rate charged by the Secretary of State. The departments having such machines will also do work for such other State Departments as shall be designated by the Board of Control. The funds herein appropriated shall be disbursed to the Public Junior Colleges which qualify to receive it on the basis of One Hundred Eighty-nine Dollars (\$189) per capita for each full-time student equivalent enrolled in approved courses of study, or proportionately if the total appropriation made by this Article should be insufficient to provide the full One Hundred Eighty-nine Dollars (\$189) per capita.

The term "full-time student equivalent" as herein used shall be defined as a student taking fifteen (15) semester hours of approved courses; and the number of full-time student equivalents for any Junior College to be benefited by this Article shall be determined by dividing by fifteen (15) the total number of semester hours of approved courses carried by all eligible students as of November 1st in each fiscal year, except that not more than eighteen (18) semester hours being carried on that date by any individual student shall be counted, nor shall the semester hours carried by any student in excess of a total of sixty-six (66) semester credit hours earned in a Public Junior College be counted; and provided further that the count of semester hours shall not include those being carried by any students who have not made timely compliance with the requirements of Section 3 (a) above, nor those being carried by any students (except Vocational Rehabilitants) whose tuition and fee expenses are paid by the United States Government.

Sec. 5. The expenditure by a Public Junior College of any funds received by it under the provisions of this Article shall be limited to the payment of adequate instructional salaries and the purchase of supplies and materials required for adequate instruction.

Sec. 6. The compliance of a Public Junior College with the requirements set forth in Sections 2, 3, and 5 of this Article shall be ascertained by the State Auditor who shall certify immediately his findings to the Texas Central Education Agency. The amounts of the State Auditor's actual costs in performing the duties specified in this Article are to be transferred by the State Comptroller of Public Accounts from the funds appropriated in Section 1 above, and such transferred funds are hereby reappropriated to the State Auditor.

Sec. 7. Vouchers for disbursement of the sums appropriated herein shall be prepared by the Texas Central Education Agency on the basis of the State Auditor's findings as prescribed in Section 6 of this Article. It is expressly provided that the Texas Central Education Agency may in October of each year prepare vouchers for payment to each eligible Junior College of an installment not to exceed fifty per cent (50%) of the lesser of the following two (2) amounts: (1) the State apportionment such College received for the preceding fiscal year, or (2) an estimate certified by each College president as to the probable total apportionment that will be due his College for the current fiscal year. After the receipt of the State Auditor's certificate as provided in Section 6 of this Article, the Texas Central Education Agency shall prepare vouchers for the payment of the balance due each College for that fiscal year after deducting such installment payments previously made. In submitting

vouchers for disbursement of the funds herein appropriated, the Texas Central Education Agency shall certify to the State Comptroller of Public Accounts that each school listed has qualified and is entitled to receive such funds under the terms of this Article.

Sec. 8. Any amount appropriated herein and not used during the fiscal year ending August 31, 1952, is hereby reappropriated to be used for the same purposes during the next fiscal year. Any amount appropriated or reappropriated and not used during the fiscal year ending August 31, 1953, shall revert to the General Revenue Fund of the State.

Sec. 9. Any deliberate falsification by any official or employee of any Public Junior College of the student enrollment records or the records of tuition payments and receipts whereby that College's share of Public Junior College State Aid has been or would be illegally increased, shall cause the withdrawal of all further financial aid provided under this Article. The State Auditor is hereby directed to report any instances of such falsification of records to the Legislative Audit Committee, and whenever the Committee finds, after giving the college adequate notice and fair hearing, that a deliberate and intentional falsification of records has occurred, the Committee shall certify its findings to the State Comptroller who shall deny payment of any further funds herein appropriated to such Public Junior College.

ARTICLE V—AGENCIES OF HIGHER EDUCATION

Sec. 11. Southwestern Medical School. The Board of Regents is hereby authorized to accept grants, donations and gifts for the exclusive use and benefit of the Southwestern Medical School of the University of Texas. Provided, however, that this Section shall not be construed so as to authorize, without the prior and specific approval of the Legislature, the acceptance of real property or chattels which will require appropriations by the Legislature for maintenance or repair.

Sec. 12. University of Texas Medical Branch. It is provided that the Medical Branch may employ at not to exceed Nine Thousand, Six Hundred Dollars (\$9,600) per year each to not to exceed eight (8) professors for the School of Medicine of the University of Texas, such professors to be nationally distinguished in their field. Provided further, that such salaries may not be paid except upon written approval of a majority of the Board of Regents, and the minutes of the Board shall set forth in detail the reasons for granting such salaries. Provided, that the Board of Regents of the University of Texas is hereby authorized to fix reasonable rates to be charged and collected from pay patients of said hospitals, and is further authorized to make and enter into contracts for the hospitalization of the indigent sick, and to accept donations and gifts for the support and maintenance of said hospitals. Provided, however, that this provision shall not be construed so as to authorize, without the prior and specific approval of the Legislature, the acceptance of real property or chattels which would require appropriation by the Legislature for maintenance or upkeep.

Sec. 13. University of Texas School of Dentistry. There is hereby reappropriated for each of the fiscal years of the biennium covered by this appropriation any unexpended balances remaining in the funds appropriated by House Bill No. 319, Chapter 584, Acts of the Fifty-first Legislature, Regular Session, 1949, to the University of Texas School of Dentistry.

Sec. 14. Medical and Dental Buildings. From and after September 1, 1951, all balances on hand or remaining in the State Hospital Fund as created by Article XIX, House Bill No. 3, Chapter 2, Acts, First Called Session, Fifty-first Legislature, and all moneys accruing to said fund on and after September 1, 1951, from any and all sources whatsoever are hereby transferred to the General Revenue Fund, being the excess over

HIGHER EDUCATION—GENERAL PROVISIONS

The expenditure of the appropriations herein made and authorized, whether from the State General Revenue Fund, local institutional funds, or any other receipts and funds whatsoever, except bequests and gifts, shall be subject to the following provisions:

Sec. 15. Annual Budgets. It is expressly provided that the Governing Board of each of the educational institutions named herein shall approve on or before September 1st of each year of the biennium an itemized budget covering the operations of the ensuing fiscal year, which budget shall be prepared within the limits of the revenue available from legislative appropriations and estimated local and other funds.

All subsequent changes in this budget shall be approved by the Governing Board and shall fall within the total funds estimated to be available for the year. The said Governing Board is held strictly accountable to the Legislature for spending the appropriations herein made wisely, economically, and for the best interests of the several institutions of higher learning and the State.

The Governing Boards of the respective institutions of higher education of this State are hereby directed to forward copies of the approved budgets herein provided to the State Comptroller, and also copies of all minute items of approved changes in the budgets authorized by the Governing Boards.

Sec. 16. Budget Approval When Required. The Legislative Budget Board is hereby authorized to require the submission of a budget for its approval prior to the expenditure of any of the funds appropriated to the state institutions of higher education and to the other educational agencies of the State of Texas named in this Article. Such requirement, when exercised, shall be made by filing written notice with the State Comptroller and written direction with the institution or agency. After the effective date provided in such notice, no moneys herein appropriated shall be expended until such budget approval shall have been secured. The authority granted by this paragraph shall be exercised only in emergencies. The Legislative Budget Board shall determine when such an emergency exists.

Sec. 17. Uniform Financial Accounts and Reports. All institutions of higher education in Texas for which appropriations have been made in this Article shall keep their financial accounts in accordance with the recommendations of the National Committee on Standard Reports for Institutions of Higher Learning, and shall, within one hundred twenty (120) days after the close of each fiscal year, file with the Governor and the State Board of Education, printed financial reports set up in accordance with the forms recommended by said committee in its publication

entitled "Suggested Forms for Financial Reports of Colleges and Universities," which reports shall be subject to public inspection.

Sec. 18. Fiscal Regulations: Each of the institutions named in this Article is hereby authorized and directed to compile a set of regulations which shall include the local rules and regulations for the fiscal management of that institution; the general provisions, prohibitions, and requirements of this Act; and the applicable provisions of other State or Federal laws and regulations governing the custody, expenditure, and accountability for and of public funds.

Sec. 19. Salary Payment Report: The Governing Boards of each of the several institutions, within seventy-five (75) days after the close of each fiscal year of the biennium, shall file with the Governor and the State Auditor an itemized schedule of salaries and wages paid to all employees who received Five Hundred Dollars (\$500) or more for services during the fiscal year out of any funds from any source or character under the control of the Governing Board, showing for each employee the total amount of payments from each source during the twelve (12) months of the fiscal year, the title of the position or kind of service rendered, and a summary of all such expenditures by departments. These reports shall be subject to public inspection.

Sec. 20. Limitation on Courses of Study. None of the appropriations herein made and authorized, whether from the State General Revenue Fund, local instructional funds, or any other receipts and funds whatsoever except bequests and gifts, shall be expended for the continuance or establishment of a department of instruction which was not in existence on October 1, 1950, nor for courses of instruction required for any degree which was not being offered by the institution on October 1, 1950, provided that Lamar State College of Technology is authorized to offer the Bachelor of Science degree and the courses of instruction leading thereto and certificates of completion in technical and terminal courses of less than four (4) years duration. This section shall not apply to Reserve Officers Training Corps instruction; and in the event of a National Emergency, the Legislative Budget Board may authorize additional courses requested by the Federal Government in the interest of National Defense.

Courses of study in conflict with the provisions of this Section shall be terminated on or before August 31, 1951. By October 1st of each of the fiscal years in the biennium following August 31, 1951, the appropriate governing board shall certify to the State Comptroller the compliance by each educational institution with the provisions of this Section. The State Comptroller is hereby authorized and directed to withhold payment of funds herein appropriated for any of the above named institutions of higher education until said certificate of compliance has been received.

Sec. 21. Standards for Size of Academic Staffs. The number of full-time teachers employed in each teaching institution named in this Article shall not, for the fiscal year beginning September 1, 1951, exceed the ratio of one such teacher for each fifteen (15) full-time student equivalents enrolled in such institution on the sixth class day of the spring semester of 1951 or the sixth class day of the fall semester of 1951, whichever is the greater number.

The number of full-time teachers employed in each teaching institution named in this Article shall not, for the fiscal year beginning September 1, 1952, exceed the ratio of one such teacher for each fifteen (15) full-time student equivalents enrolled in such institution on the sixth class day of the fall semester of 1952; provided, however, that this limitation for such fiscal year may be relaxed with the approval of the Leg-

islative Budget Board in the event of an unforeseen National Emergency.

The two preceding paragraphs shall not be construed to require any institution to increase its staff, the ratio specified being only a maximum limitation on the number of the teaching staff. The intent of the Fifty-second Legislature is to limit the number of teachers employed at each institution to a reasonable number so that adequate salaries may be paid to those who are employed, and to preclude overstaffing which requires the money appropriated to be divided between too many teachers.

For the purposes of this section the following definitions shall apply:

A "full-time teacher" shall mean the equivalent of a teacher who devotes his full time to classroom instruction. In cases where a member of the teaching staff, including administrative heads of departments, graduate assistants, and others who devote only a part of their time to classroom instructional activities, a "full-time teacher" equivalent shall be defined as one who teaches fifteen (15) semester credit hours each week. Part-time teaching shall be computed on this basis.

"Teaching institution" shall mean each of the eighteen (18) academic colleges and universities named in this Article. Not included are the medical and dental schools and other agencies of higher education.

A "full-time student" shall mean the equivalent of a student who is registered in residence for fifteen (15) semester credit hours per semester.

The reports on full-time student equivalents and full-time teacher equivalents shall be made by each institution affected by this section to the Legislative Budget Board through the Texas Central Education Agency on the following dates: for the sixth class day of the spring semester of 1951 on July 1, 1951; for the sixth class day of the fall semester of 1951 on November 1, 1951; for the sixth class day of the fall semester of 1952 on November 1, 1952.

It is expressly provided, however, that Lamar State College of Technology is excepted from all the foregoing provisions of this Section for the biennium beginning September 1, 1951; and it is expressly provided that the Texas State College for Women is excepted from all of the foregoing provisions of this Section for the fiscal year beginning September 1, 1951.

Sec. 22. Teaching Loads. During the biennium for which these funds are appropriated, it is declared the intent of the Fifty-second Legislature that the Governing Boards and heads of all State institutions of higher education shall offer only such courses and teach only such classes for which there is such a demand that each full-time teacher shall have a teaching load that is economically justified; that they shall offer no elective course with an enrollment of less than ten (10) students in the lower division classes, and six (6) students in the upper division undergraduate classes, and further that required courses under these limits should be kept to a minimum. The State Commissioner of Education shall submit to the Legislative Budget Board by November 15th and April 15th of each year, a list of classes having fewer than such numbers of students by institution and by each semester of the regular session, and for the summer school, indicating which of the courses are elective and which are required, as reported to him by the respective institutions of higher education as of their sixth class day.

Sec. 23. Academic Rank Distribution: The individual members of the teaching staff in each educational institution named herein shall be distributed as evenly as is practicable among the academic ranks of Instructor, Assistant Professor, Associate Professor and Professor, subject to an absolute limit of not more than forty per cent (40%) in any one rank at any one time. For the purposes of this Section, in computing

the number of teaching staff, those who devote only a portion of their time to classroom instruction shall be counted in their respective academic ranks on the basis of the fractional part of the full-time work load which is devoted to teaching.

Sec. 24. Additional Salary Payments. No institution of higher education shall pay in excess of the salary rates specified for the itemized positions in this Article, excepting only those which are designated as "part-time."

Any other employees who distribute their time and duties between general administration, instruction, activities related to instruction, and/or the management of auxiliary enterprises, may receive their total salary payments in proportionate parts from such activities and from the appropriated or available funds therefor.

The rate of the salary paid an employee of any educational institution named herein for services during a summer session shall not exceed the salary rate paid the employee for the same or similar services in that institution during the preceding long session.

Full-time employees on twelve (12) months basis may receive not more than Five Hundred Dollars (\$500) for correspondence course and/or extension center teaching and may not be paid additional money for summer school teaching; and full-time employees on a nine (9) months basis may be paid for correspondents and/or extension center teaching or summer school or other services during the remaining three (3) months of the fiscal year, but may not receive more than at the rate of Five Hundred Dollars (\$500) per annum for correspondence course teaching during the fiscal year and/or extension center work during the regular nine (9) months session.

Sec. 25. Employee Transfers and Promotions. It shall be the duty of the executive head of any agency of higher education to transfer members of the faculty and non-academic employees of the agency to any other position when necessary or desirable to increase the effectiveness and efficiency of the agency. Additional positions may be added only with the consent of the Governing Board of the agency of higher education. Such position shall not pay larger amounts than those provided for similar positions in such agency; in the event there are no similar positions within such agency, such additional positions shall not pay larger amounts than those provided for similar positions in other State institutions, departments, or agencies.

Sec. 26. Vacation Allowance. Vacation allowances shall be set for officers and employees who serve on a twelve (12) months basis by the Governing Boards of the various educational institutions in conformity with the provisions for vacation allowance specified by the Fifty-second Legislature in Article III of this Act.

Sec. 27. Holidays. Legal holidays and Christmas holidays to be observed by the institutions of higher education shall be equivalent to those specified by the Fifty-second Legislature in Article III of this Act, except that the Governing Boards of the various educational institutions may adjust the actual observance of such holidays to such times as will permit efficient academic schedules.

Sec. 28. Office Hours. State employees shall work a minimum of forty-four (44) hours per week excepting Sundays and legal holidays.

Sec. 29. Transfer Limitations. The amounts appropriated in this Article for General Administration, salaries only, shall not be increased from transfers from other funds. Transfers out may be made with the approval of the Governing Boards of the respective institutions.

None of the moneys appropriated specifically for Resident Instruction, salaries only, may be transferred out of that item during the fiscal year

beginning September 1, 1951. To meet emergency situations which might arise during the fiscal year beginning September 1, 1952, due to unforeseen military requirements and sharp decreases in student enrollment, transfers of moneys out of the item Resident Instruction, salaries only, may be made to General Operating Expense subject to the advance written approval of the Legislative Budget Board.

Transfers of moneys into Resident Instruction, salaries only, from any other appropriated items, whether general revenue or local funds in character, may be made with the approval of the Governing Boards of the respective institutions.

Sec. 30. Definitions of Terms. The term General Operating Expenses as used in this Article shall mean necessary operating expenses for General Administration; necessary operating expenses and salaries for instructional departments other than resident instructional salaries; salaries and necessary operating expenses for extension and correspondence teaching, libraries, and organized activities related to instruction; improvements and repairs; physical plant operation and maintenance; bond premiums; workman's compensation insurance payments where authorized by law; travel and equipment.

The term Vocational Teacher Training Supplement as used in this Article shall mean salaries, current charges, travel, supplies, and miscellaneous operating expense.

Sec. 31. Local Income from Educational Activities. The governing boards of each of the colleges or universities for which appropriations are made herein shall deposit in the State Treasury all cash receipts from all sources except auxiliary enterprises, noninstructional services, agency and restricted funds, endowment funds, student loan funds, and Constitutional College Building Amendment Funds. The State Treasurer is directed to credit such receipts deposited by each such institution to a separate fund account for the institution depositing the receipts, but he shall not be required to keep separate accounts of types of funds deposited by each institution. For the purpose of facilitating the transferring of such institutional receipts to the State Treasury, each institution shall open in a local depository bank a clearing account to which it shall deposit daily all such receipts, and shall, not less often than every five (5) days, make remittances therefrom to the State Treasurer of all except Five Hundred Dollars (\$500) of the total balance in said clearing account, such remittances to be in the form of checks drawn on the clearing account by the duly authorized officers of the institution, and no disbursements other than remittances to the State Treasury shall be made from such clearing account. All moneys so deposited in the State Treasury shall be paid out on warrants drawn by the Comptroller of Public Accounts, as is now provided by law.

All the funds deposited by each college or university as above provided are hereby appropriated to the respective institutions to be expended as provided in this Article. In the event the amount of local receipts deposited in a fiscal year be less than the amount of said Estimated Other Income for each institution, this Act shall not be construed as appropriating additional funds from General Revenue to make up the difference.

Each institution affected by this Section is hereby authorized to set up a Revolving Fund to facilitate the payment of nominal expenses, to pay bills within cash discount periods, and to pay day and weekly payroll claims, etc. Disbursements from the revolving funds are to be reimbursed from the respective appropriations made herein, the State Comptroller being hereby authorized to make such reimbursements on claims filed with him by the institutions under his regularly prescribed

procedures except that one (1) voucher and one (1) warrant may cover any number of claims for this purpose. These reimbursement claims shall meet the same requirements as other claims against State appropriations, and each institution shall prepare such a reimbursement claim as at the close of business on the last day of each month and as many times during each month as may be expedient in order to make unnecessary the maintaining of an unreasonably large revolving fund.

The respective governing boards shall determine, subject to the approval of the Legislative Budget Board, the amounts of the revolving funds to be set up for each institution, and may increase or decrease the amounts in the same manner if necessary. Such Board shall designate a depository bank for each revolving fund, and shall specify the officers and/or employees to sign checks drawn on each such fund. The revolving fund for each institution may be set up from State appropriations herein made for General Operating Expenses, or from local funds on hand at August 31, 1951. The depository bank for each revolving fund shall be required to secure the deposit as provided by law.

Sec. 32. Other Institutional Receipts. No property valued in excess of Five Hundred Dollars (\$500) and belonging to any of the institutions herein provided for, or any agency thereof, shall be sold or disposed of without the direction of the Legislature or the consent of its Governing Board, and all proceeds from the sale of such property, from labor performed, from the sale of materials, crops, and supplies, from fees and any and all other receipts, shall become and are hereby appropriated for the use of the respective institutions to be expended in compliance with the provisions of this Act and under the direction and with the approval of the Governing Board having jurisdiction. Any balance remaining to the credit of any of said institutional local funds at said institution at the end of any fiscal year is hereby appropriated for the above-mentioned purposes for the succeeding year.

Sec. 33. Local Depositories. The Governing Boards of the respective institutions for which appropriations are made in this Article are hereby authorized to select depository banks for the safekeeping of local funds other than those specified in Section 31 of this Article. The Boards shall require said depository banks to furnish adequate surety bonds or securities to be posted for the assurance of safety of such deposits. The depository bank or banks so selected are hereby authorized to pledge their securities for assurance of safety for such funds. All such local funds shall be deposited in these depositories within five (5) days from date of collection. The Governing Boards may require the depository so designated and selected to pay interest on deposits at a rate to be agreed upon by said depositories and said Boards.

It is hereby declared the legislative intent that the Governing Boards and heads of the several State institutions of higher learning shall not borrow money from any person, firm or corporation to be repaid out of local funds, other than as specifically authorized by legislative enactment.

Sec. 34. All State-owned motor-propelled passenger-carrying vehicles except buses under the control of any institution or agency of higher education are hereby declared to be no longer needed. Such vehicles shall be sold in compliance with and as provided for in Article 666, Revised Civil Statutes of Texas, as amended, or otherwise as provided by law, not later than October 1, 1951. No such vehicle may be purchased with any of the funds appropriated in this Article, provided, however, that these provisions of this Section in regard to the sale and purchase of such vehicles shall not apply to jeeps equipped for fire-fighting purposes or to passenger vehicles equipped with two-way radios used by the

Texas Forest Service of the Texas Agricultural and Mechanical College System for fire protection purposes.

Notices shall be given in writing to persons now using said vehicles of the time and place they are to be sold in order that such persons may have an opportunity to bid on said vehicles.

Funds derived from the sale of such vehicles are hereby appropriated for General Operating Expenses, in addition to the sums otherwise appropriated in this Article, to the institution or agency of higher education selling such vehicles.

Sec. 35. **Traveling Expenses.** No traveling expenses shall be incurred by Board Members, heads of institutions, or by any employee of any of the schools, or other agencies named herein, inside or outside the boundaries of the State of Texas, except for institutional business as approved by the Governing Board of the several institutions named herein, including the formal presentation of original researches, by an employee, if before a national, regional or state learned society approved in advance by the administrative head of the school, and no travel shall be performed outside of the state except upon the written consent of the school's Board of Regents or executive head. All persons employed in any capacity by these State educational institutions and agencies, except heads of institutions named in this Article and members of the Boards who do not receive an annual or monthly salary, who travel at the expense of the State are limited to the amount of Four Dollars (\$4) per day for meals and a total of Six Dollars (\$6) per day for meals and lodging; it being specifically provided that the employees, shall obtain receipts for all amounts expended for lodging and other expenses except meals, local telephone and taxi fare; and shall file such receipts with their expense accounts as provided for employees of State Departments, and the local disbursing officers shall require the same method of claim presentation and forms. The expenses of Regents or Directors shall be approved by the presiding officer of the Governing Board, and the expenses of all other employees shall be approved by the President or Chief Financial Officer, and the Auditor of the college or institution.

It is provided further that any officer or employee who travels on official state business, and who uses his own car while doing so, shall be reimbursed for the use of said car on the basis of the total mileage traveled during any calendar month at the following rates: Six Cents (6¢) per mile for the first thousand (1,000) miles traveled, and Five Cents (5¢) per mile for each mile traveled in excess of one thousand (1,000) miles. Before the Comptroller or disbursing officer of the educational institutions hereinbefore named shall issue any such warrant for reimbursement, the said officer or employee shall file an affidavit with the Comptroller or disbursing officer showing the point of origin and the point of destination of his trip and the mileage actually traveled. If the Comptroller or disbursing officer is of the opinion that said officer or employee did not take the shortest practicable route to the point of destination and return, the Comptroller or disbursing officer shall have the authority and it shall be his duty to compute the mileage of the shortest practicable route between the point of origin and destination and return, and he shall issue his warrant or check in reimbursement therefor on the basis aforesaid.

Sec. 36. **Rental of Machines and Equipment.** None of the moneys herein appropriated shall be used for the rental of office machines or any equipment of any kind without first having presented a requisition for the rental thereof to the Board of Control and secured said Board's written approval thereof; and the State Comptroller, or any local disbursing officer, shall not issue warrants or checks in payment of state

rental without said Board's written approval. No agency of the Government or any state employee shall permit any seller who has bid on new machines or new equipment of any kind to deliver any used or rented equipment in fulfillment of such order, even though said equipment has been used by the agency so deciding to purchase.

Sec. 37. Air Conditioning Equipment. The expenditure of any funds herein appropriated, whether from the General Revenue Fund or from receipts and income from Educational and General activities, for the purchase of new or additional air conditioning or refrigerating equipment for any purpose except food preservation, laboratory or scientific purposes, hospitals and replacement parts in existing installations, is expressly prohibited for the biennium beginning September 1, 1951.

The purchase and installation of air conditioning or refrigerating equipment as a part of new construction of research and laboratory facilities are exempt from the provisions of this Section.

Sec. 38. Audits. The State Auditor shall make annually an audit of the books and accounts of each of the institutions for which funds are appropriated herein, and the State Comptroller shall charge the costs of such audits, as certified to him by the State Auditor on the completion of each such audit, out of the appropriations herein made for General Operating Expenses at the several institutions.

Sec. 39. Estimates Required. If any executive officer of an institution named in this Article shall fail or refuse to furnish estimates to the executive budget office, as required by Article 642 of the Revised Civil Statutes of Texas, 1925, as amended, on or before the first day of April, 1952, and April, 1953, such fact shall be certified by the Executive Department to the State Comptroller of Public Accounts, who shall thereafter not issue his warrants upon any fund belonging to that particular institution for any purposes, until said estimate is filed with the executive budget office.

Sec. 40. Athletic Departments. The general provisions of this Article shall not apply to athletic departments. The Governing Boards of the respective institutions of higher education shall make such necessary rules and adjustments as may be deemed advisable for the management and operation of such departments.

Sec. 41. Postage Stamps. None of the money appropriated herein for postage stamps shall be spent except on warrants and checks made payable to a United States Post Office and the warrant or check shall be endorsed by the Postmaster from whom the purchase is made.

Sec. 42. Printing and Stationery. All printing and stationery shall be purchased through the Board of Control and shall be confined to such articles and qualities as are selected and contracted for by said Board, except said printing provided by law to be done by several of the State institutions. No embossed or engraved printing or stationery shall be purchased. This Section shall not be applicable to any institution which operates its own printing plant.

Sec. 43. Student Registration Reports. The Governing Boards of each of the several institutions herein appropriated for shall file for each institution under their respective jurisdiction, on or before October 1, 1952, in the office of the Secretary of the State Board of Education a report showing the number of semester credit hours registered for, as well as the number of such hours completed, for the lower level, upper level, and in technical courses of instruction as those terms are defined in the biennial report of the State Board of Education of 1934-36, as well as the number of student registrations in the lower level and upper level, for the long sessions of 1950-51 and 1951-52 and for the summer sessions of 1951 and 1952. Thereafter, as soon as the information is available,

said Boards shall file a semester report, as outlined above, for the first semester of the long session of 1952-53, and shall file a semester report showing the number of semester credit hour registrations in the lower level, upper level, and technical courses of instruction, as well as the number of student registrations in each classification as of the close of registration for the second semester of the long session of 1952-53.

Sec. 44. Employment of Aliens.
